

**Q: I get Internet Explorer Cannot Open the Internet Site... Operation Aborted**

A: Blame Microsoft for this one!

<http://support.microsoft.com/default.aspx/kb/927917>

It is linked to the Tooltips provided by Joomla and occurs usually on large pages:

The simplest solution is to change:

```
/libraries/joomla/html/html/behavior.php  
~line 108
```

```
$tooltipInit = ' window.addEvent('domready', function(){ var JTooltips = new Tips  
($$(".{$selector.}"), '.$options. '); });';
```

To:

```
$tooltipInit = ' window.addEvent('load', function(){ var JTooltips = new Tips  
($$(".{$selector.}"), '.$options. '); });';
```

Or you can turn the Tooltips off.

Or you can do as Microsoft suggest and persuade your users to upgrade to IE8 or just use Firefox!
