_____

Hello,

first i want to say that it is a great extension (modul) for joomala - Thank you.

So not to my problem:

I use Joomla 2.5, Eventlist 1.0.2 and want to try the Qivva ajax Calendar for joomla 1.6.

But its not really working.

If i disable the joomla Sef then i can the modul but if i want to change the month - i see nothing.

MAybe someone have the some problem and can write how to fix it.

Thank you
