

## Calendar disappear after clicking on a date

Posted by burger88 - 2012/08/14 17:47

---

Hi all. I am using Eventlist 1.0.2 with the Calendar module for Joomla 1.6 non-ajax.

Whenever I click on a date with events, the event details page will be displayed. However, the calendar module disappears. How do I let the calendar to be displayed consistently among all the pages?

Do note that I have multiple copies of this calendar on my site on different pages with the same position, and therefore I cannot choose to display the calendar on all pages for menu assignment.
