

COMPLETED: Calendar for Archived Events

Posted by grisswold - 2008/12/03 07:23

I would be very thankful if there were to be a parameter or feature of the eventlistcal to view archived events... ^_^

New version 0.9 just out (30/12/08) has the feature to choose to show a calendar of archived events.

Regards

Toni

I need to use archive and upcoming events. How can I do it?

2 calendars - 1 for archived, 1 for upcoming. Either that or just don't archive or delete the old events, then they will still be there on the upcoming calendar. Or only archive after an extended period of time - the eventlist component lets you choose.

Regards

Toni

I understand that this solution is not available for now, but maybe you will think about it in the future? :-)It will be very usefull for me. I have to collect information about events from 1966.

All the best from Wroclaw
