eventcalq15 - show complete weeks ?
Posted by luisraposo - 2009/07/28 06:54

_____

hello there,
I like this module very much, and it is working just fine :)

My events take place usually on the weekends.
If the end of the month is in the beginning/middle of the week, users will not notice events on the last weekend (since it belongs to the month after).

Would it be possible to add a selectable option to display the full weeks instead?

thanks, and keep up the good work!
luis raposo

_____

well, I have put my hands on this subject and.. got it!
http://www.kotasbiketeam.org/tmp/mod_eventlistcal15q_0.92_showfullweeks.zip

you may use it at your will, and see if it fits your needs
(the changes are signaled with /* kotasbiketeam */)

after updating, go to the module configuration, and enable the "Show Full Weeks?" option

luis raposo

ps: you may see it in action at www.kotasbiketeam.org

Well done - I'm sure some people will find this useful.

Regards
Toni
