

Choosing what should be shown in the Tooltips

Posted by bat - 2009/08/29 08:40

Hello,

Thanks for the update of the Calender, I especially like being able to show both existing and archived events in the Calender without having to hack the files.

Was wondering if it were possible to be able to choose what is shown in the tooltips and in what order also from the Admin Area.

I would like to be able to show the time that an event starts and the event, but in order to do so I have to change the code. Other users may want other information shown and in a different order. At the moment users can choose to show the Category and/or the Venue, but not the Time or the Order in which they are shown.

Don't really know how much work this would require, I just think that this may be interesting/useful for many users, especially those who are not comfortable playing with the code.

Once again, Thanks for the Calender, and keep up the good work on it

I'll consider this for the next version.

There is a post somewhere in the Forum that gives you the code changes for displaying the time.

Regards

Toni
