

## Calendar to stay in month of viewed event

Posted by alixbu - 2010/02/18 11:21

---

Hi there,

first of all thank you very much to write this fantastic module. We love it!

Would it be possible to add a feature where the calendar would stay in the month of the viewed event? Currently when clicking into a passed or future month and viewing an event, the calendar jumps back to the current month. It would be great if the calendar could stay in this month in order to be able to browse through the events of the selected month.

Thanks for considering it.  
Greetings from Costa Rica!  
Alix

Hi

There already is a feature within the calendar module.  
In the calendar parameters there is a Remember parameter. If selected to Yes - the calendar stays at the month last viewed rather than jumping back.

Regards  
Toni
