

Show events in module for one city only?

Posted by toca1234 - 2010/03/02 08:45

Hi!

I use the calendar and think it's great. But, i have events for a lot of different cities and would like to filter a module to show only events from one city?

Right now it's only possible to filter for category or venue..

Is it possible? :)

Lukas
