

display 2 months

Posted by seancon1 - 2010/04/20 04:14

any way to display the next month under the current month?

the calendar looks empty towards the end of the month

Thanks

Sean

You can just add another calendar module and set the parameter to show month +1

I'm sure there is an example of this in the Demo section (Multiple calendars with Offsets)

Regards

Toni

ahhh... i missed the demo link!

thank you worked perfectly

Sean
