

## change layout - display days in one line

Posted by antitaste - 2010/05/11 07:32

---

Hi,  
I just started to use the calendar, which works great. However, I'd like to change the display of the calendar so that the days would be displayed:

- 1) in horizontal line, one cell after another, the first cell being the current day;
- 2) the line should contain the next 30 days, and then there should be an arrow to the following 30 days.
- 3) It should be ajaxed, as I don't want the page to re-load

Any one could help me with this? Thanks!
