

no tooltips when page cached

Posted by miooh - 2011/07/25 19:56

Hello,

I can't resolve this problem... When page cache is on (Global Configuration > System > Cache Settings > Cache ON) tooltips don't display. There is only little square without any text. But... it happens only on startpage. When I click any event and go to event's page - tooltips displays. Can you help me?

Joomla 1.5.23
EventList 1.0.1
Qivva Eventlist Ajax Calendar Module 1.0.1
Mootools 1.2.5 (upgrade plugin)

:blush: Sorry for my English

Hi

I expect the issue is using the Mootools upgrade plugin. The calendar for Joomla1.5.xx uses the older version of Mootools. Try switching the mootools upgrade off.

Regards
Toni

I'm sorry... When I turn off Mootools upgrade nothing happens... It's the same - no tooltips, only little tooltip yellow square without any text.
