

Categories filter not working with archived events

Posted by Steph282 - 2011/07/31 13:13

If the flag "Show Archived events" is activated, the categories filter is not working, all the events are displayed.

The problem can be solved by doing a small modification in the helper.php file.

From line 52 :

```
if ($CurrentEvents==1)
{
$wherestr = ' WHERE (a.published = 1';
}
else
{
$wherestr = ' WHERE (a.published = 0';
}
if ($ArchivedEvents==1)
{
$wherestr = $wherestr. ' OR a.published = -1)';
}
else
{
$wherestr = $wherestr. ')';
}
```
