"Hi,

Calender is appearing fine but it does not move to next month or previuos month, it is satatic does not give any error message also, yes there is one error message at my browser footer saying done but with errors.

Kindly advise. "

I now got the same errors. Is that "bug" fixed? Or can anybody help

Many, many ....

I think this issue was the one caused by a change in Joomla. That's why there are separate calendars for 1.5.22 and 1.5.23.

Please check you have the right calendar version for the Joomla version you have.
