

## the skip-symbols and the month-name take 5 lines

Posted by peterpain - 2011/10/08 07:28

---

Good morning,

I have installed eventlist 0.2Beta5 and Qivva EventList Ajax Calendar Module for Joomla 1.6.x an my Joomla 1.7.1. But, as you can see on the image below, the caption takes 5 lines. I don't know how to fix it, but I'm sure somebody can do it, because the problem isn't to difficult.

Firebug show this:

>

Thanks for the help :cheer: <http://extensions.qivva.com/images/fbfiles/images/calendar.jpg>

Hi

I'm guessing there is something in your stylesheet (template probably) that is overriding the calendar style.

If you use Firefox you can use firebug to find out what it is.

It's usually padding that causes this.

Regards

Toni

of course it was soething in the stylesheet ...

it was display: block

may u fix it in a further release

or evreybody with this problem fix it himself.

Btw nice work

Regardes peter
