

Error on calendar clicks

Posted by xstu25 - 2011/12/13 22:32

Hello !

Thanks for your jobs who works well since I use it.

I just install joomla 1.7 and Eventlist 1.0.2., and the Qivva EventList Ajax Calendar module.

When I click on the calendar, I have many error like this

Notice: Undefined property: stdClass::\$params in
/homez.356/eaubonnef/www/libraries/joomla/document/html/renderer/module.php on line 71

Notice: Undefined property: stdClass::\$module in
/homez.356/eaubonnef/www/libraries/joomla/application/module/helper.php on line 148

Notice: Undefined property: stdClass::\$params in
/homez.356/eaubonnef/www/libraries/joomla/application/module/helper.php on line 152

Notice: Undefined property: stdClass::\$module in
/homez.356/eaubonnef/www/libraries/joomla/application/module/helper.php on line 155

Notice: Undefined property: stdClass::\$content in
/homez.356/eaubonnef/www/templates/system/html/modules.php on line 17

Is there a way to solve this problems ?

Thanks for any help !
